

PRODUCT INFORMATION

SKU# **G-CS-C**

Application:

Car Shampoo is a premium, pH-neutral car wash concentrate designed for manual cleaning. Its gentle formula provides a luxurious, low-foaming experience that effectively removes dirt, grime, and road film while being safe for all painted surfaces, plastic trim, and rubber components.

Description:

- . Concentrated formula with dilution 1:50 to 1:100 with water, making it highly economical.
- . Neutral pH to be safe for all car surfaces, including delicate clear coats, waxes, and sealants.
- . Delicate foam that provides a smooth and gentle washing experience, minimizing the risk of scratches.
- . Rinses clean easily: Leaves your car sparkling and streak-free.
- . Pleasant fragrance to enjoy a refreshing scent while you wash.

Direction of use:

1. Rinse your car thoroughly with clean water to remove loose dirt and debris.
2. Fill a wash bucket with clean water and add the appropriate amount of Car Shampoo according to your desired dilution ratio (1:50 for heavily soiled cars, 1:100 for lightly soiled cars).
3. Using a soft wash mitt, dip it into the soapy solution and gently wash your car in sections, starting from the top and working your way down. Rinse the mitt frequently in the bucket.
4. Thoroughly rinse your car with clean water, ensuring all soap residue is removed.
5. Use a clean, microfiber drying towel to gently dry your car.

Additional Tips:

- . Wash your car in a cool, shaded area to prevent soap from drying too quickly and leaving water spots.
- . Avoid using circular motions while washing, as this can increase the risk of scratches.
- . Never use dish soap or other household detergents on your car, as they can damage the paintwork.
